Sequence 1686, Application US/10665951

Sequence 1686, Application No. U520040138163A1

SERRARA INFORMATION:

APPLICANT: Birna Therapeutics, Inc.

APPLICANT: Begelman, Leonid

APPLICANT: Pavoco, Pamela

TITLE OF INVENTION: Growth Factor and Vascular Endothelial Growth Factor Receptor TITLE OF INVENTION: Growth Factor AD-131 (MHB02-742-F)

TITLE OF INVENTION: Gene Expression Using Short Interfering Nucleic Acid (siNA)

FILE REFERENCE: 400/131 (MHB02-742-F)

FILE REFERENCE: 2003-09-18

PRIOR FILING DATE: 2003-09-18

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Publication No. US20040138163A1

GENERAL INPORMATION:
APPLICANT: Sirna Therapeutics, Inc.
APPLICANT: McSwiggen, James
APPLICANT: Beigelman, Leonid
APPLICANT: Pavco, Pamela
TITLE OF INVENTION: RNA Interference Mediated Inhibition of Vascular Endothelial
TITLE OF INVENTION: Growth Factor and Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Growth Factor and Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Growth Factor and Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Growth Factor and Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Growth Factor And Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Growth Factor And Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Growth Factor And Vascular Endothelial Growth Factor Receptor And Vascular Endoth
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps

Sequence 48, Application US/09841366A

Sequence 48, Application US/09841366A

Patent No. US20020058265A1

GENERAL INFORMATION:
APPLICANT: Bacher, Jeffery W.
APPLICANT: Flanagan, Laura
APPLICANT: NETABLITY AND ITS USE IN
ITILE OF INVENTION: DETECTION OF MICROSATELLITE INSTABILITY AND ITS USE IN
ITILE OF INVENTION: DIAGNOSIS OF TUMORS
FILE REPERENCE: 16026-9267

CURRENT APPLICATION NUMBER: US/09/841,366A

CURRENT ELING DATE: 2001-07-16

PRIOR FILING DATE: 2000-09-15

NUMBER OF SEQ ID NOS: 68

SOFTWARE: Patentin Ver. 2.1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    APPLICANT: Flanagan, Laura

Sequence 168, Application US/09908147
Sequence 168, Application US/09908147
Publication No. US20030144221A1
GENERAL INFORMATION:
APPLICANT: Hong Zhang
TITLE OF INVENTION: ANITSENSE MODULATION OF BCL2-ASSOCIATED X PROTEIN EXPRESSION
FILE REFERENCE: RTS-0185
CURRENT APPLICATION NUMBER: US/09/908,147
CURRENT FILING DATE: 2001-07-17
NUMBER OF SEQ ID NOS: 168
SEQ ID NO 168
       APPLICANT: Brett P. Monia
APPLICANT: Andrew T. Watt
TITLE OF INVENTION: ANTISENSE MODULATION OF INHIBITOR-KAPPA B-R EXPRESSION
TITLE OF INVENTION: ANTISENSE MODULATION OF INHIBITOR-KAPPA B-R EXPRESSION
FILE REPERENCE: RTS-0302
CURRENT FILING DATE: 2001-11-13
NUMBER OF SEQ ID NOS: 89

US-10-136-145-29/C
US-10-136-145-29/C

Sequence 29, Application US/10136145

Sequence 29, Application WS/10136145

Publication No. US20030216559A1

GENERAL INFORMATION:
APPLICANT: Adema, Gosse Jan; Figdor, Carl Gustav.

TITLE OF INVENTION: Melanoma associated antigenic polypeptide,

TITLE OF INVENTION: epitopes thereof and vaccine against melanoma.

NUMBER OF SEQUENCES: 38

CORRESPONDENCE ADDRESS:

STREET: Adema, Gosse Jan; Figdor, Carl Gustav
